TEN CENTS A WEEK

WORK OF RESTORATION ALREADY UNDER WAY

Plans For Reconstruction Are
Being Rapidly Drawn.

NEW CITY TO BE GREATER ONE

Streets Are Being Cleared for Traffic
Numerous Street Car Lines Ready
For Operation, and Rapid Highway
Is Being Made in Repairing Mains.

San Francisco, April 26.—It was a week Wednesday since this city was visited by an earthquake, which laid low the metropolis of the Pacific coast and started a conflagration unequalled in the history of this country.

Although the ruddy glow of the dying embers of the great fire still nightly illuminate the sky, the work of restoration is already well under way.

Plans for the construction of the new buildings to replace those destroyed by earthquake and flames are rapidly being drawn and work on some of them will begin as soon as the ruins of the old buildings are cold. Many of the new planned buildings are on a larger scale than those ticked up by the flames, giving promise that from the ashes will rise a new San Francisco, greater and more beautiful than the old.

In addition to the large force of men and teams already at work, about 50 teams of government mules were put to work Tuesday hauling away the debris. Several more streets were cleared for traffic, numerous street car lines are ready for operation, while the repairing of the water mains and the work of restoration of the gas and electric systems is making rapid headway. Work on taking down and rebuilding the ferry tower began Wednesday.

The exodus from the city continues all day Tuesday a constant stream of men, women and children, afoot and on every conceivable vehicle, wended their way down Market and Mission streets toward the ferries.

A little bundle on a stick carried over the shoulder represented all the worldly possessions of some; others had grips, and baskets, and a great many had saved trunks and furniture

still wet from the rain. Everything possible was done to alleviate their distress by putting women and children in houses, but as no fires were allowed, and there is a lack of blankets, it helped but little.

As a result of Mayor Schmitz's sharp letter to General Koster, commanding the national guard in which the mayor calls the general's attention to the fact that the city was not under martial law, and that the drastic measures and arbitrary actions of some of his men which have caused so much complaint, were illegal and requesting him to put a stop to it, there was but little shooting Tuesday night in the district over which the militia holds sway.

street after 10 o'clock Tuesday night and a sentry shot through the window. A looter who broke into several places in Valejo street, is reported to have been shot by a marine sentry.

An alleged thief, who is said to have jumped out of a window with a bundle of clothing at Pierce and O'Farrell streets early Wednesday morning, is reported to have been shot by a national guardsman.

The fact that two companies of the Fourteenth United States Infantry from Vancouver went to Oakland to do guard duty in that city, indicates that the militia will be recalled.

Three Bodies Found in Ruins.
San Francisco, April 26.—The bodies of three men and one woman were found among the ruins in the burned district Tuesday. One of them, which is identified as that of John Hynes, was found at Eighteenth and Kentucky streets. Hynes met death by drowning. The remains of another man were found in the ruins of the Southern Pacific building, and those of an other at 552 First avenue. The body of the woman was found at Sixth and Townsend streets. None of the three could be identified.

El Paso Filled with Refugees.
El Paso, Tex., April 26.—El Paso bids fair to become overrun with San Francisco refugees. Every train is bringing many penniless refugees, the relief committee furnishing them free transportation. It may be necessary to raise funds to help them. The Maobees started a movement Tuesday among all the Texas lodges of that order to assist the San Francisco members of the order. The fund will be sent to the camp commander.

Lost Valuable Manuscripts.
Sacramento, Calif., April 26.—Mr. R. A. Crothers, proprietor of the San Francisco Bulletin, arrived in Sacramento Tuesday night. He said he lost everything in his home at 106 Bush street, where were collected a valuable mass of manuscripts and other articles belonging to the late Mr. Loring Pickering. Among these was the manuscript of a historic journalism by Mr. Pickering. Most of the files of the Bulletin were saved, and those lost can be replaced.

1,500 Tons of Supplies.
Tacoma, Washington, April 26.—The United States cable ship Hurside sailed from Tacoma Tuesday night, direct for San Francisco, with a full cargo of 1,500 tons of supplies purchased by the chamber of commerce relief committee from local contributions and from funds telegraphed from Philadelphia, Boston and other cities.

QUIET NOW REIGNS IN ILL-FATED CITY

Telephone Communication Has
Been Re-established.

ELECTRIC LIGHTS ARE BURNING

Train Service on Several Roads Has
Been Resumed—General Condition
in San Francisco Is Reported To Be
Greatly Improved.

San Francisco, April 26.—Things are quieting down in San Francisco.

Telephonic communication with Oakland has been re-established. For the time being, the service will be confined to business communications, but will be extended very soon. Telephone service will be resumed in the undestroyed portions of the city in a few days.

The Bell railroad is now operating around the water front, and all sorts of supplies are being distributed from there. The electric lights were started on East street Tuesday night and these lights will be extended to the wharves right away. There will be plenty of electric lights immediately.

An official list of the condition of the school buildings throughout the city, shows that 29 buildings were utterly destroyed and that 44 were at least partially spared. As many of the latter were so damaged that they will have to be either pulled down or thoroughly repaired. It is likely that the resumption of the short term will be begun in tents in the parks.

A force of 200 physicians and surgeons is now making an inspection of sanitary conditions under the orders of the health commission.

There are 107 companies on shore the San Francisco insurance loss. This loss is estimated by the local agents at between \$175,000,000 and \$200,000,000, but New York sends word that the insurance men there think the loss will not exceed \$125,000,000. Chicago's loss was \$125,000,000 and, three companies defaulted to the amount of \$45,000,000. The loss in Baltimore was paid in full. It amounted to \$35,000,000.

The state supreme court made a sweeping order granting a rehearing in all cases in which a petition has been filed and in which the time for granting a rehearing will expire before the first day of May. The purpose is to prevent lapses which deprive parties from a suit and completing the records within the time specified in the rule. A similar order was made in respect to appeals in that court from the United States district court of appeals.

The sailing of the Oceanic Steamship company's steamer Honoma for Australian ports having been indefinitely postponed, it has been decided to divert all mail for Australia via Vancouver, and it is due to leave there on April 27th.

The steamer Alameda, belonging to the same line, will likely sail for Honolulu on April 28.

Train service on the Southern Pacific coast division, operating between this city and Los Angeles via San Jose, was resumed Wednesday, but the terminal will be Oakland Pier instead of Third and Townsend streets, and the trains will run via Niles and San Jose. Service will also be resumed via San Jose and Santa Cruz, Monterey, Salinas, San Luis, Obispo, etc.

Oil Did Not Suffer.

Los Angeles, April 26.—California's oil has not suffered from the earthquake in the southern part of the state. This is the statement of the officials of the various petroleum companies.

Will Take Charge of Property.

Sacramento, Cal., April 26.—Secretary Metcalf, of the department of commerce and labor, passed through here Tuesday night on his way to San Francisco, to take charge of the federal properties and buildings as special commissioner from the president and representing the president in this matter. He was accompanied by Congressman McKinley, W. P. announced he would at once proceed to San Francisco.

REUNION CALLED TO ORDER.

Everything Points to Most Successful
Reunion of Organization.

New Orleans, April 26.—Under weather conditions that were ideal, attended by a multitude that tried to the utmost the great auditorium erected for the occasion, and with enthusiasm unbounded, the annual reunion of the United Confederate veterans was on Wednesday called to order by General Stephen D. Lee, the commander-in-chief.

Everything at the outset points to one of the most successful reunions in the history of the organization.

The hall in which the reunion is to be held is as beautiful as a structure of bare boards could be made. Every roof pillar was covered from top to bottom with white and red bunting wound in alternate bands and between these uprights hung, first the confederate flag, then the national colors, then the stars and bars again, the spaces being filled in this manner from end to end of the hall. The roof was concealed by ropes of red and white tissue, caught up at regular intervals by small confederate flags.

Portraits of the leaders of the Confederacy were placed at regular intervals throughout the hall.

Missing Dentist Has Been Located.

Spartanburg, S. C., April 26.—Dr. Oscar Nichols, whose disappearance from Enoree created considerable excitement a week ago, and who it was thought at the time, had been murdered and his body thrown in the river, has been located by the receipt of a letter from him addressed to a member of his family. He is somewhere in Tennessee, though at what point is not known, as the missive was mailed on a railway mail car. Dr. Nichols says he is well and contented, but assigns no reason for his leaving home. This is to some degree solves a mystery that has puzzled the people of Enoree, where Dr. Nichols practiced dentistry and where he lived with his family, consisting of a wife and two grown daughters.

Hurt in Auto Accident.

New York, April 26.—While returning from the Aqueduct track Tuesday, Frank Farrell, owner of many thoroughbreds, owner of the New York Baseball club and an automobile enthusiast, met with a painful accident. While bowling at a smart clip his automobile swerved and ran into a telephone pole. The impact wrecked the auto and pitched the three occupants out. The chauffeur and Mr. Farrell's friend escaped with a shakeup and a few scratches, but Mr. Farrell was shot ahead with great violence, flying clear over the front seat and landing on the sidewalk. He was rendered unconscious for a time, and his ankle was dislocated.

First Mail from Frisco.

Chicago, April 26.—A sackful of tragedy and pathos reached the Chicago postoffice Tuesday night when the first mail from San Francisco direct since the earthquake was received. The sack contained several thousand communications from the fire sufferers to Chicago relatives and friends. They were written on shreds of wrapping paper, pieces of box covering, strips of shorting, cuffs and other odds and ends. None bore postage, but all had the red ink stamp of the San Francisco postoffice. Some contained the one word, "Saved," others told stories of death and hardships.

Texas Lynched Negro.

Oakwood, Tex., April 26.—A 17-year-old negro boy was lynched Wednesday morning by a mob of men who took him from the custody of the local sheriff. The negro had stripped himself and entered the home of a widow near town. He was caught and fully identified, and was awaiting transportation to the county seat. The deputy sheriff who had the prisoner in charge, freed several others at the members of the mob, but without effect.

Prepares for Strikers.

Paris, April 26.—According to a semi-official statement made by a high functionary of the prefecture of police, the military and police are prepared to meet even eventually May 1st. He said the police reserves shows that 80,000 men have stopped work, of which number the disorderly element does not exceed 20,000.

STRUCK WITH AXE WOMAN IS SLAIN

Mrs. Mollie Glover Found Dead
In Bed.

MURDER SHROUDED IN MYSTERY

The Woman Was Struck with the Ax
Probably Twenty Times—Police
Have No Clue to Guilty Party—Cyl
Luttrell Held on Suspicion.

Bristol, Tenn., April 26.—Mrs. Mollie Glover, a woman 30 years of age, was found dead in her bed at the home of Cyl Luttrell on Second street shortly after midnight Wednesday morning with her head split open and almost severed from the body. A large bloody ax found lying under the bed told the story.

The murder was committed about 11 o'clock, and is shrouded in mystery, though Cyl Luttrell has been arrested and is in jail on suspicion. He is about 57 years of age, and an old employee of the Norfolk and Western Railway company.

Luttrell, who was working Tuesday night, claimed that he left the house about 9 o'clock, and locked the door and on returning about 11 o'clock found the door as he had left it, and entering, found the bed coverings completely over Mrs. Glover, and things in a disturbed condition about the room. He says he raised the cover and the ghastly sight of the woman lying in a pool of blood with the bed clothing completely saturated, met his eyes and he ran.

Late Reporting the Murder.

Luttrell did not report the murder for an hour, and when arrested was very nervous and told what the police regard as flimsy tales of the circumstances leading up to the murder.

It is believed that the woman was at Luttrell's house for immoral purposes. Luttrell has a wife and large family of grown children.

The police say his past reputation in this respect has been shady, and they do not doubt but that the relations of Luttrell and Mrs. Glover were intimate and she came to his house to stay during the night.

The woman was struck with the ax probably twenty times, and the police have no clue to the guilty party.

Mrs. Glover had a refined appearance, and was considered good looking.

Cotton Manufacturers Assemble.

Boston, April 26.—The fourth annual meeting of the New England Cotton Manufacturers' association assembled Wednesday at the Massachusetts institute of technology for a two days' session. The presence of a commission representing prominent English spinners who have come to this country to investigate the growing of cotton and other questions connected with the raw material, was one of the features of the convention. Among the important matters to be passed upon was a proposition favored by the board of rules to change the name of the association to the National Cotton Manufacturers.

Divine Healer Is Fleeting.

El Paso, Tex., April 26.—"Pope" Schneider, claiming to be the head of the "Divine Catholic Church," and known throughout the west as a "divine healer" reached here Tuesday afternoon fleeing from San Francisco. He said he feared his entire family was lost, and that not half the horrors of the disaster had been reported.

Angry Strikers Surround Plant.

Kenosha, Wis., April 26.—Offers by Charles W. Allen, head of the Allen Cannery, in this city, in hopes of checking the strike, have proved futile. An angry mob surrounded the plant and trouble is feared. The men have made a written demand on the company demanding an increase of \$1 a week and a three years' contract.

Walter Wellman Sails.

New York, April 26.—Walter Wellman, the newspaper man who will next June make an attempt to reach the north pole by dirigible balloon, sailed Tuesday for Europe on the steamer Kaiser Wilhelm II.

Typical Scene in Concentration Camp

It is estimated that 60,000 people were furnished with free transportation to the different parts of the state by the Santa Fe and Southern Pacific railways.

The relief work is now thoroughly organized, and is rapidly becoming to be thoroughly systematized.

The rain was followed by a cooler atmosphere, which caused some suffering.

Many people walked for hours to keep warm; others huddled around little camp fires, shivering with cold. In some instances their clothing being

MR. W. W. ASHLEY DIES SUDDENLY

Found Dead at His Desk in Sun Office Thursday.

CAUSED BY HEART DISEASE

Was in His Usual Good Humor During Day, and His Demise Was a Great Shock to People of the City—Funeral Today.

Mr. W. W. Ashley, associate editor of The Sun, was found dead at his desk in the editorial rooms just before the clock in the court house tower announced the hour of six Thursday afternoon.

The discovery was made by T. J. Faus, an attache of the composing rooms, who reported the same to J. R. Merchant, making the remark that Mr. Ashley was asleep in his chair. Mr. Merchant, who was seated in a room adjoining, feeling that there was evidently something wrong, immediately went to investigate, and a shocking sight greeted him. Mr. Ashley was seated in his chair, with his head thrown back—dead. With the exception of the attitude of his head, he appeared to be in the act of preparing copy, and it was evident that he was engaged in the preparation of an article, as his pen lay on the floor beside him and an unfinished sentence lay on the table before him, these circumstances seeming to indicate that the end came without a struggle, being caused from heart disease.

Mr. Merchant immediately telephoned for a physician, but it being impossible to reach one by this method, he made haste to the street, when he reported the matter, afterwards summoning Undertaker Dr. T. F. Thomas, and also Dr. Clyde Carter, but upon viewing the body the physicians readily discerned that life was extinct. Dr. Thomas took charge of the remains, when, a short while later, they were removed to his late home, 808 North Oak avenue.

The news of his death rapidly spread throughout the city, and was greeted with a spirit of deep sadness, as he numbered his friends by his acquaintances.

Deceased was born in Danville, N. Y., in the year 1849. A few years later his parents removed to Eaton Rapids, Mich., at which place they made their home. At the age of fifteen years Mr. Ashley entered the printing business, engaging in the work as an apprentice. He learned rapidly and was soon actively engaged on leading papers in Toledo, Detroit, Chicago and other cities. His services were always in demand, his work being thorough and efficient.

Mr. Ashley visited Florida for the first time in 1900, locating for the winter in this city. In the spring he returned to his Michigan home, but since that time he has been a regular winter visitor to this State, spending the greater portion of his time in Gainesville. About two years ago he decided to make Florida his permanent home, believing the climate of this State to be of benefit to his health, and accordingly moved here, being accompanied by his sister, Mrs. Sarah Elizabeth Smith. For some time they were located at the National Odd Fellows' Home, but for the past year have made their residence at 303 North Oak avenue, he being engaged as associate editor of The Sun. He was a member of the Knights of Pythias and Odd Fellows' orders, and took considerable interest in fraternal work.

Mr. Ashley's ability as a writer is well known, and few men of the profession ever reach the degree of efficiency that characterized his work. He was always jovial and his pleasant countenance will be greatly missed by his associates in the various departments of the office.

Deceased is survived by a widowed sister, Mrs. Sarah Elizabeth Smith, and other distant relatives residing in Missouri.

The funeral services will be conducted from the residence at 1:30 o'clock this afternoon, Rev. Thos. P. Hay of the First Presbyterian Church officiating. Friends are invited. The remains will leave via the Atlantic Coast Line at 2:40 this afternoon for Eaton Rapids, Mich., at which place the interment will occur and the body laid to rest in the family burying ground.

The Sun extends profound and deepest sympathy to his bereaved sister in this her hour of sadness.

BARGAINS IN MEDICINE.

A woman once wrote us that she was not going to buy Scott's Emulsion any more because it cost too much. Said she could get some other emulsion for less money. Penny wise and pound foolish. Scott's Emulsion costs more because it is worth more—costs more to make. We could make Scott's Emulsion cost less by using less oil. Could take less care in making it, too. If we did, however, Scott's Emulsion wouldn't be the standard preparation of cod liver oil as it is to-day.

None was fatally hurt.

New York, April 26.—Cord Meyer, chairman of the Democratic state committee, who has just returned from Europe, confirmed Tuesday the report that he intends to resign the chairmanship.

PHYSICAL HARMONY.

Therein Lies the Secret of Health and Long Life.

The necessity of relative harmony throughout the entire physical system cannot be too strongly urged. Herein lies the chief secret of health and long life. Manifest weakness or even predominant strength in any part opens the avenue for the invasion of disease and the approach of death. What can be done for the realization and maintenance of structural and vital harmony? Space would fail us to give details adapted to varying conditions, but the underlying fundamental principle for its accomplishment may be imparted in few words. Strive to strengthen and develop those parts of the body which have been slighted by nature or weakened by disease or abuse; guard zealously such structures and see that they are never subjected to undue strain or too active exertion; neglect not the improvement of every part of the economy, but seek first to improve the weakest structures; look well to organs of vital importance—the heart, lungs, kidneys, etc.—and seek especially to advance their good. A fine physique is not to be ignored, but of far greater importance are a strong pair of lungs, a normal, well guarded heart, good digestive apparatus and functionally sound kidneys. The developing and strengthening of vital structures require more skill and perseverance than the training of the muscular system and should be conducted with much care and diligence.

A Princely Gift.

Perhaps the most magnificent gift ever made by any individual to any nation was the presentation by Lady Wallace to the English nation of her husband's remarkable art collection in 1897. It contains over 600 pictures of every school, including thirteen by Sir Joshua Reynolds, furniture, china and objects of art innumerable, of a value between \$15,000,000 and \$20,000,000. It was left absolutely to the nation, the only stipulation being that it should be kept distinct from other national collections.

A Secret Defined.

A secret is a thing which you communicate to one whom you can trust. He, in turn, tells it to somebody that he can trust, and that somebody reveals it to another somebody whom he can trust. And so it goes the rounds, but it is still a secret, although everybody knows it.

Also Elsewhere.

In England it is not what you know that is of importance, but whom you know; not what you are, but who you are; not what you do for yourself, but what others will do for you.—London Truth.

MEMORIAL DAY FITTINGLY KEPT

Both Blue and Gray Unite in
Strewing Flowers on Graves.

A LARGE NUMBER TAKE PART

Exercises Very Impressive—Address
by Judge Horatio Davis in the After-
noon—Large Number Present at the
Court House Square.

Memorial Day was fittingly observ-
ed in Gainesville by both those who
wore the Blue and the Grey. The
ladies of both Chapters of the U. D. C.,
the G. A. R. and Confederate Veter-
ans all participated in the exercises.

Nine thirty in the morning all left
the court house square in carriages for
the cemeteries, where the graves of
the departed heroes were decorated.

In the afternoon the exercises were
conducted in the court house yard in
an appropriate manner.

The ladies sang "America," which was
followed by a fervent prayer by Rev.
T. J. Nixon, pastor of the Methodist
church of this city. The ladies then
sang "Tenting on the Old Camp
Ground," which was followed by the
address of the day by Judge H. Davis.

Judge Davis made many beautiful
remarks befitting the occasion.

The exercises were concluded by the
sounding of taps by Trumpeter Wal-
lace of the Gainesville Guards.

The Confederate monument was
beautifully decorated for the occa-
sion.

will take over all the stock of the

sides conducting a general engineer-
ing and construction business, though
that concern will act as a holding con-
cern for the securities of the electrical
supplies.

CARD FROM MR. MILLER.

Writes an Interesting Appeal in Behalf
of Candidate Love.

Editor Sun: Will you kindly give
space in your paper for a few lines
from this section, the home of an as-
pirant for the important place of
county treasurer, T. J. Love. Mr.
Love's many friends at home feel very
grateful to Mr. Robertson for the po-
sition he has taken in behalf of one of
her citizens just at this time. A good
deal could be said in favor of Mr. Love
in this race for county treasurer, but
Mr. Robertson has said enough—
he has told "the truth in a nut-
shell." Whoever in the county is
undecided as to whom to cast their
vote for May 15th, can rest assured
that our friend and neighbor, T. J.
Love, will round up a rousing major-
ity at home on primary day. He is an
honest gentleman, whose character is
above reproach and an earnest Chris-
tian worker. The writer has known
Mr. Love since his (the writer's) early
childhood, and this gentleman who
asks us again for our support at the
polls has for these many years been
regarded as a peaceful, unpretentious
citizen and a faithful Christian. To
say he makes no mistakes, has no
faults, or possesses no imperfections
of character, would not be true to the
facts. No man leads a faultless life.
On the other hand, to say he has suc-
ceeded well in building up a Christian
character, is to speak the truth, for he
is consistent and faithful in the service
of his Master. The estimation in
which he is held by his neighbors is
sufficient to justify those not acquaint-
ed with him in the belief that he is
the man for county treasurer. Let the
voters of old Alachua get together and
give Mr. Love a handsome majority.

Texas Holds Henry Seigler.

Augusta, Ga., April 26.—Habeas
corpus proceedings instituted in Johnson
county Texas, has brought to a stand-
still the case of Henry Seigler, charged
with kidnaping. The Seigler case
is familiar. For some time past the
man has been wanted in Augusta for
kidnaping his own child. Several
weeks ago he was located in Texas,
identified, and arrested by the local
authorities. Requisition papers were
taken out, and Officer Stafford was
deputized to bring the prisoner to
Augusta. He was expected to return
last week, but before he could obtain
custody of his man, Seigler's attor-
neys in Texas began the habeas cor-
pus proceedings. Constable Stratford
will remain in Johnson county until
a decision is reached.

Bank in Examiner's Hands.

Gadsden, Ala., April 26.—Federal
Bank Examiner Silas H. L. Cooper,
has taken charge of the First National
Bank of Attalla, and has closed its
doors. The only information to be
had is that the examiner has taken
charge and closed the doors. It is
understood the action was taken on
orders from the comptroller of the
currency in Washington. It is said
the bank is only temporarily embar-
rassed and will be able to resume. L.
M. Dykes is president and some of the
leading business men of Attalla are
directors. The capital stock is \$25,
000. It is believed that the statement
of the bank up to April 6 caused the
investigation which led to suspension.

Girl's Assailant Slain by Father.

Grosbeck, Tex., April 26.—While
being conveyed to jail in the custody
of two officers, a negro, who, it is
alleged, assaulted the daughter of J.
A. Eastland, a farmer of Delta, at an
early hour Tuesday morning, was
taken from the officers by a posse of
citizens and held until the arrival of
the girl's father. When Eastland rode
up he ordered the crowd to stand
back and he emptied both barrels of
his shotgun, loaded with buckshot,
into the negro killing him instantly.
There is no excitement.

liams, a well known merchant of Bar,

and was near death when I began tak-

pletely cured me and I have remained
well ever since." It cures hemorrhages,
chronic coughs, settled colds and bron-

weak lungs. Every bottle guaranteed

The Hospital

Thankful are They
Who Escape The
Surgeon's Knife

Thousands of surgical operations are per-
formed every year in our great city hospitals
upon women afflicted with serious female
troubles. Sometimes the operations are suc-
cessful—oftentimes they are not.

It is safe to say that certainly nine out of ten operations
for female troubles might have been wholly avoided.

The most valuable tonic and re-builder of the female
organism, the medicine with a record of thousands of cases
literally snatched from the operating table, is

Lydia E. Pinkham's Vegetable Compound

Do not consent to an operation which may mean death until after
you have given Lydia E. Pinkham's Vegetable Compound a fair trial.
Note what it did for Mrs. Paul Oliver, whose letter follows:

DEAR MRS. PINKHAM:—I was suffering from pains in my side and
a serious female trouble. The doctors said to get well I must have an
operation performed, but I would not consent to that.

I heard of Lydia E. Pinkham's Vegetable Compound and sent for a
bottle; the first dose did me good, and after taking the first bottle I could
sleep all right and I did not have those pains in my abdomen which I had
all the time before. Now I can ride ten miles in a carriage, my color has
returned, and I am full of life. I owe all this to the Vegetable Compound.

It has also done wonders for my thirteen-year-old daughter. I will
never cease to praise it and recommend it to my friends.

MRS. PAUL OLIVER, St. Martinsville, La.

Thousands of women, residing in every part of the United
States, bear willing testimony to the wonderful virtue of Lydia
E. Pinkham's Vegetable Compound. It cures female ills and creates
radiant, buoyant female health. For your own sake try it.

Lost Architects Heard from.

New York, April 26.—August O.
Hoddick, an architect of this city, and
his brother Arthur Hoddick, of Buffa-
lo, N. Y., who, it had been feared, had
been lost at sea while making from
Charleston, S. C., to Norfolk, Va., in a

gale threw their launch upon the coast

the occupants were almost without
food for a week.

Men Fought Like Beasts.

Warsaw, Russian Poland, April 26.—
Religious frenzy characterized the
fighting at Lesnos on April between
Catholic and Mariavits when ten per-
sons were killed and 77 were wound-
ed. Four priests were terribly mu-
tilated. The men fought like beasts.
The antagonists gouged out the eyes
of their adversaries. The Catholics,
who were beaten, threaten to arrange
a St. Bartholomew massacre.

here Wednesday. Time 1 minute, 13

MR. ASHLEY DEAD.

It is with the deepest and most profound regret that The Sun is forced to record the passing away of a member of its staff, and in the demise of Mr. W. W. Ashley, who expired very suddenly while at his desk late Thursday afternoon, we, as well as the fraternity at large, suffer the loss of a valuable and painstaking worker.

Mr. Ashley was originally from New York State, but spent the greater portion of his life in Michigan, engaging in newspaper work when he reached the age of fifteen years. He had been a regular winter visitor to Florida for a number of years, spending the time mostly in Gainesville. About two years ago he decided to cast his lot with us and became a permanent citizen, and since that time has been serving The Sun as associate editor, a position which he filled most admirably. He was acquainted with many members of the press of Florida, and the news of his death will be received with sadness by all.

Mr. Ashley was a man with a most jovial disposition, always ready with a pleasant remark for those with whom he came in contact, and his passing away will be deeply felt by the people of Gainesville, and especially his associates in a business way, with whom he was a general favorite.

A boxing contest at Los Angeles, Cal., netted \$4,000 for the earthquake sufferers.

The Russian constitution is said to be a farce. However, there is no one disappointed.

Should the bill limiting fortunes to millions become a law, most of the editorial fraternity will submit without a murmur.

The people of Jacksonville are at present watching the baseball score. If the team should lose they will score the players.

If Gorky had only went to a San Francisco hotel, instead of stopping at New York, he might have received a shock that would have jarred him.

Stranger, with all the excitement of the earthquake and other disasters, President Fairbanks collected.

SAN FRANCISCO.

That buildings do not make a city will be demonstrated by the rapidity with which San Francisco resumes its place among the world's great emporiums. What makes a city, a great city, is great men, men to whom adversity is but a challenge to rise above circumstances and conquer conditions. A city's greatness consists also in its connections with the rest of the world. Within a few weeks all of the great transcontinental lines of railway will again connect San Francisco with the East and with Europe. Her coastwise lines on the Pacific will equally soon resume their schedules with the North and South coast, and the transpacific liners will abate little from the splendid record which they have made in the past, in bringing the Western world in closer touch with the Orient.

The fact is that this nation cannot spare San Francisco any more than it can spare New York, or Chicago or New Orleans, says The Wall Street Journal. She is needed, where her ashes now lie, as the gateway to the Hawaiian Islands, our watch-tower in the Pacific. She is indispensable as a strategic factor in our influence in Asia. She is to our western ocean frontage almost what the Kelbur Pass is to England's frontier in northwestern India. We must not weaken an iota, but ever be strong at that point of vantage for our own sake.

Not many months hence the world's lumber schooners will again throng her wharves for cargoes to every quarter of the globe. The sailing ships of all nations will again call for their burdens of golden grain. From land and from sea will come again those immense stores which have always filled her warehouses with the things that minister to the material wants of man.

A city with such a ministry, of such strategic value, of such people may be destroyed, but it cannot be burnt up, but it cannot be taken from the earth. San Francisco, the golden city of the West, the gateway to the nation, to the Pacific, to the Orient. With magnificent harbors, with magnificent views, with magnificent climate, with magnificent scenery, with magnificent people, with magnificent history, with magnificent future, San Francisco will be a beautiful city.

THE STRUGGLE.

The struggle for life demands so much of the time of most people that they have no thought of anything else. Any pursuit that abnormally develops a passion for greed must necessarily prove disappointing and harmful. The glutton invariably falls a victim to his appetite. A criminal sooner or later comes to grief because of his own indiscretions. A drunkard loses control of himself and dies from the effects of his excesses. This same line of reasoning applies to money-mad men of wealth. Their greed for riches in time changes to an uncontrollable passion, and then they become selfish, miserly, money maniacs.

The true enjoyment of life is found in an endeavor to do good in the world. First, it is essential that a person should try to be good, and then the work of scattering sunshine is easy. Grabbing money may have its allurements, but they are as nothing compared to the contentment good deeds bring to those who do them. A ceaseless struggle after wealth puts a life of good deeds beyond the reach of rich people. They have neither the sympathy nor the training to help those in need, and the only method open to their narrow view of philanthropy is to build churches, colleges and libraries with their money.

The only safe trust in the country is to trust in the tariff.

Hair preparations and dandruff cures, as a rule, are sticky or irritating affairs that do no earthly good. Hair, when not diseased, grows naturally, luxuriantly. Dandruff is the cause of nine-tenths of all hair trouble, and dandruff is caused by a germ. The only way to cure dandruff is to kill the germ, and, so far, the only hair preparation that will positively destroy the germ is Dr. Williams' Herpicide—absolutely free from grease, sediments, and poisonous drugs. It makes hair grow naturally, and destroys the germ. Sold by all druggists. Stamps for 10¢.

POY GAINESVILLE

VICIOUS SEA SNAKES

THERE ARE FIFTY VARIETIES, ALL OF THEM VENOMOUS.

With the Exception of the Cobra and Bushmaster of Africa. No Serpent on Land Kills So Quickly and Terribly as Do Those of the Ocean.

Fearlessness is one of the most striking characteristics of sea snakes, and it adds greatly to the danger that is to be apprehended from them, for it often leads them to attack fishermen and swimmers, and even to climb up the anchor chains and through the hawse holes and attack the crew, and as the bite of every one of the fifty known varieties is fatal there is great fear felt of them in the ocean spaces which they inhabit.

These fifty varieties are all classified under the general title of thanatophidia. None of them is able to live anywhere except in ocean water. Every variety and subvariety is as poisonous as the cobra or the bushmaster of Africa. Indeed, with the exception of these two land varieties, there is no snake on land that kills so swiftly and so terribly as do the sea snakes. Owing to their fatal weapons and their ease and celerity in swimming there are practically no enemies which destroy enough of them to diminish their numbers.

Almost all the thanatophidia are beautifully colored, even more gorgeous than any of the land snakes, with the possible exception of the coral, crabs and carpet snakes. They are banded, striped, speckled and blotched with green, olive, yellow, blue and black and present a most brilliant spectacle as they are seen swimming below the surface of the transparent blue of the Indian ocean. When they are swimming at the ordinary rate of speed they seem to undulate all over. They do not wind through the water as the eel does, but their locomotion resembles that of the caterpillar except that it is far more graceful, and as they move and twist the colors play along their sides and backs as they do on the dolphin. When they dash at their prey at full speed they move like an arrow, with their heads and necks thrust straight before them if they are swimming under the surface, or, if they are darting along the top of the water, with their heads elevated just enough to clear the waves. When they are racing along thus their sole means of locomotion is their broad, paddle shaped tail, which is peculiar to all the sea snakes and forms the only striking difference between them and the ordinary land serpent.

This paddle is used like a steamer's screw and has immense power. Bent sideways it will stop the snake immediately as if the creature had anchored suddenly. When dozing or resting over reefs, which are common in the coral banks, snakes hold fast to the rocks or bottom with their broad tails and will often away in this way for hours in calm weather.

Men may have recovered from the bites of these serpents, but there are certainly none on record. Most of their victims are Malay and other native fishermen, and shore dwellers and physicians rarely get to see them. Statistics are not kept in that part of the world, so it is impossible to ascertain how many are killed in this way each year. Travelers say that there is hardly a fishing village which has not its tale of death to tell.

Scientists once held to the opinion that the deadliness of the bite was due not to the venom, like that of the land snakes, but to some property that caused blood poison, as does the bite of many fishes which are not poisonous in themselves. But this opinion was changed after the medical men on board the British warship *Albatross* had made careful observations of a sailor who had been bitten. They proved that the snakes were directly poisonous and that they carry fangs charged with venom exactly like the cobra.

The open ocean is the home of the sea snakes. They do not even ascend the rivers. Their favorite haunts are

the arms of the sea, which separate the islands of China, India and the south Pacific seas. They don't stay near the shores, but remain at some distance from the land. They are incapable of much movement on land, and after wriggling about and biting savagely they will stay still till they die. They are found in many parts of the world—in the Indian and Pacific oceans, from Cape of Good Hope and Madagascare to the western shores of Panama and from New Zealand to Japan, in the bay of Bengal and the sea around Nicobars, Molucca, Timor and New Guinea.—New York Herald.

Grip Quickly Knocked Out.

"Some weeks ago during the severe winter weather both my wife and myself contracted severe colds which speedily developed into the worst kind of grippe with all its miserable symptoms," says Mr. J. S. Eggleston of Maple Landing, Iowa. "Knees and joints aching, muscles sore, head stopped up, eyes and nose running, with alternate spells of chills and fever. We began using Chamberlain's Cough Remedy, aiding the same with a double dose of Chamberlain's Stomach and Liver Tablets, and by its liberal use soon completely knocked out the grip." He Was Absentminded.

The absentminded man is at it again. He had been reading the egg story and decided to try the trick. The first thing to do was to boil the egg. How many minutes? he asked himself, and, going to the stove with the egg in one hand and his watch in the other, he dropped the latter in the hot water. Then, placing the egg on the table, he sat down to read until the time was up. At the end of five or six minutes he was surprised to find the egg lying there before him, but, supposing that he had himself taken it from the kettle and cooled it, he proceeded to crack and peel it. The consequence may be imagined. Finally he missed his watch. The house was searched high and low, and it was not till the following morning that the cook found it in the kettle, where it had been boiling for hours.—Exchange.

Is The Moon Inhabited?

Science has proven that the moon has an atmosphere which makes life in some form possible on that satellite; but not for human beings, who have a hard enough time on this earth of ours, especially those who don't know that Electric Bitters cure headache, biliousness, malaria, chills and fever, jaundice, dyspepsia, dizziness, torpid liver, kidney complaints, general debility and female weaknesses. Unequaled as a general tonic and appetizer for weak persons and especially for the aged. It induces sound sleep. Fully guaranteed by all druggists. Price only 50c.

Fashions Caused by Deformities.

Of the close connection between fashion and deformity there are many examples. Through illness Philip the Good had to have his head shaved. Shaven heads, accordingly, perforce, became fashionable at his court.

The daughters of Louis XI. hid their very large feet in long dresses; hence trailing gowns.

The wife of Philip III. set the fashion of high collars in disguising her long neck with a wimple.

Henry Plantagenet introduced boots with extravagantly curved toes to conceal a growth on one of his feet.

Louis XIV. wore a wig to cover unsightly wens on his head, while James I. adopted voluminous trunk hose, afterward fashionable, to hide hip disease.

The Original.

Foley & Co., Chicago, originated Honey and Tar as a throat and lung remedy, and on account of the great merit and popularity of Foley's Honey and Tar many imitations are offered for the genuine. These worthless imitations have similar sounding names. Beware of them. The genuine Foley's Honey and Tar is in a yellow package. Ask for it and refuse any substitute. It is the best remedy for coughs and colds. J. W. McCollum & Co.

SLEEPING CARS.

The First Grade Ones Were Thought the Acme of Comfort.

Current advertisements describing the luxurious appointments offered the modern traveler on sea and land give point to the contrast afforded by the facilities of the middle of the last century, which were then regarded as the height to which the passengers had a right to aspire. The issue of the Pennsylvania Railroad and Mining Register of June 23, 1854, said:

"The Buffalo Car company lately shipped a lot of cars for the Illinois Central railroad which are far ahead of anything in their line yet seen in the west. One of them contained six staterooms, each room having two seats with cushioned backs, long enough for a person to lie upon. The backs of the seats are hung with hinges at the upper edge, so that they may be turned up at pleasure, thus forming two single berths, one over the other, where persons may sleep with all the comfort imaginable. In one end of the car is a small wash room, with marble washbowl, looking glass, etc. On the opposite side of the car from the staterooms is a row of seats with revolving backs, similar to barbers' chairs, so arranged that the occupant may sit straight or recline in an easy attitude at pleasure. The other five cars have each two or three similar staterooms."

The birth of the Pullman car came a little later. In the spring of 1858 George M. Pullman remodeled at Bloomington, Ill., a few of the cars of the Chicago and Alton and made them the first Pullman sleeping cars.—Railway World.

HEALTH IS YOUTH.

Disease and Sickness Bring Old Age.

Herbina, taken every morning before breakfast, will keep you in robust health; fit you to ward off disease. It cures constipation, biliousness, dyspepsia, fever, skin, liver and kidney complaints. It purifies the blood and clears the complexion. Mrs. D. W. Smith, Whitney, Texas, writes April 3, 1902: "I have used Herbina, and find it the best medicine for constipation and liver troubles. It does all you claim for it. I can highly recommend it." 50c. Sold by W. M. Johnson.

Whales.

Whales, though they are mammals, are fitted to live like fishes in water. The true whales are of two kinds of families—the spermaceti whale, which has teeth in the lower jaw, and the whalebone whale, which has none. Of the first-named there are two species, the cachalot and the sperm, which when full grown measures from seventy to eighty feet. The capture of this animal is attended with greater danger than that of the whalebone or Greenland whale on account of its formidable teeth.

Cured Hemorrhages of the Lungs.

"Several years since my lungs were so badly affected that I had many hemorrhages," writes A. M. Ake of Wood, Ind. "I took treatment with several physicians without any benefit. I then started to take Foley's Honey and Tar, and my lungs are now as sound as a bell. I recommend it in advanced stages of lung trouble." Foley's Honey and Tar stops the cough and heals the lungs, and prevents serious results from a cold. Refuse substitutes. J. W. McCollum & Co.

Gave Him a Start.

Holding up a pair of antique candlesticks, an auctioneer said: "Give me a start."

"A dime!" came a voice from the crowd.

"What!" exclaimed the horrified auctioneer.

"Ah," said the bidder, "I thought that would give him a start."

WHITE RAINBOWS.

They Are Formed by a Fine Rain and a Strong Sun.

Though rainbows are generally associated with colors, there is such a phenomenon as a white rainbow. The circumstances necessary for its formation are a fine rain and a strong sun. The phenomenon is due to the optic principle known as interference. If the drops of water be very small, the interference of the rays causes such a complete overlapping of the colors that the bow appears white.

That is to say, the various prismatic colors, instead of being thrown out separately, as in the ordinary prism, are thrown one on the top of the other, and the light is thrown by the sun, as it were, on a sheet of rain. The fine close rain produces the same effect as a woven texture. This result is still more noticeable where a fog takes the place of the rain.

The phenomenon is not often noticed, because the conditions necessary to the formation of a white rainbow are a strong light, a close rain and a sun lying near the horizon. These three conditions are not often present at the same time.—London Standard.

POLITICAL ANNOUNCEMENTS

For State's Attorney.

To the Democratic Voters of the Eighth Judicial Circuit of Florida:

Believing that my thirteen years' practice of law, together with my experience as a prosecuting attorney, fully fit me to discharge the duties of State Attorney, I, therefore, at the request of many friends, announce myself a candidate for nomination in the Democratic primary for State Attorney for the Eighth Judicial Circuit of Florida. If nominated, I pledge myself to courteously, economically and faithfully discharge the duties of the office and to help maintain the dignity and honor of the court.

Respectfully,
JOS. M. RIVERS.

To the Democratic Voters of the Eighth Judicial Circuit of the State of Florida:

Having served you in the capacity of State Attorney since July, A. D. 1903, and trusting that you have approved of the manner in which I have represented the State and discharged my duties, I solicit your votes at the coming primary for the position of State Attorney for the Eighth Judicial Circuit.

Very respectfully,
BENJ. P. CALHOUN.
Palatka, Fla.

I respectfully announce that I am a candidate for the office of State's Attorney for the Eighth Judicial Circuit of Florida, composed of the counties of Alachua, Baker, Bradford, Levy and Putnam. I conceive the faithful and energetic discharge of the duties of the office to be a sacred obligation to the State, and, if the voters of the circuit favor me with the nomination, I pledge them that the interests of the State and of society shall not suffer through favor or negligence of mine.

THOS. W. FIELDING.
Starke, Florida.

For State Senator.

To the Democratic Voters of Alachua County:

I have, on various occasions, been earnestly requested to enter the race for State Senator from this county, and, until now, have declined to do so, because I had no desire to oppose the Honorable H. H. McCreary, who has rendered such valuable service to our county in the State Senate. But since he has withdrawn from the race I will be a candidate, subject to the Democratic primary.

Having served in both branches of the Legislature in the past, I feel that I am the better qualified to serve the best interests of our county at this important time.

Earnestly soliciting your support at the coming primary, I am your humble servant,
JOHN B. DELL.

In reference to my declination, which appeared in The Daily Sun of March 30th, the same was made in what I conceived the interest of harmony. However, I have reconsidered same and am a candidate for the State Senate.

H. H. McCREARY.

I respectfully announce my candidacy for the Democratic nomination as Senator for Alachua county (33rd district), pledging my support of all measures in the interest of the masses as against the classes, and especially do I pledge my support and influence in aid of the common schools and maintenance of the State University upon a liberal basis, such as will enable parents to obtain for their children a thorough education in their own State, as well as all measures tending to promote the religious and moral welfare of the entire people. Thanking my friends for their support in the past, and soliciting the vote of all Democrats at the coming primary, I am very respectfully,
H. H. McCREARY.

For the Legislature.

At the solicitation of many friends I have consented to make the race for the Legislature and hereby announce myself as a candidate, subject to the Democratic primary.

THOMAS A. DOKE.

I announce myself a candidate for the Legislature at the coming primary, subject to the action of the Democratic voters of the county. If elected I will endeavor to make some very radical changes in the present divorce law. I am in favor of keeping the State University at Gainesville forever.

CHAS. HODGE.
Alachua, Fla.

At the solicitation of friends I announce myself a candidate for Member of the House of Representatives, subject to the will of the people, as expressed at the Democratic primary election.

I shall favor the maintenance of the State University, now established in this county, with liberal appropriations for its development, and the advancement of public education throughout the State.

I believe in a Railroad Commission and shall support any legislation enlarging its powers and increasing its usefulness.

All measures tending toward the moral development and growth of our State will receive my hearty support.

ROBT. E. DAVIS.

S. L. Carter will be a candidate at the primary election for Member of the Lower House of the Florida Legislature.

For County Treasurer.

To the Democratic Voters of Alachua County:

I hereby announce myself as a candidate for County Treasurer, subject to your action at the primary of May. Respectfully,
Gainesville, April 7. L. T. ROUX.

For Tax Collector.

To the Voters and Tax-Payers of Alachua County:

I take this method to publicly thank you for the very liberal support you have given me in the past, and to announce my candidacy for re-election for ensuing term to the office of Tax Collector of Alachua county. The arduous duties of the office, at this, the closing period of 1906 collection, will entirely prevent my making a canvass of the county and seeing you in person, so I trust my friends throughout the county will remember me on the 15th of May at the various precincts, when casting ballots for the men of their choice to fill the respective offices now elective. VICIOUS SEA SNAKES

THERE ARE FIFTY VARIETIES, ALL OF THEM VENOMOUS.

With the Exception of the Cobra and Bushmaster of Africa, No Serpent on Land Kills So Quickly and Terribly as Do Those of the Ocean.

Fearlessness is one of the most striking characteristics of sea snakes, and it adds greatly to the danger that is to be apprehended from them, for it often leads them to attack fishermen and swimmers, and even to climb up the anchor chains and through the hawse holes and attack the crew, and as the bite of every one of the fifty known varieties is fatal there is great fear felt of them in the ocean spaces which they inhabit.

These fifty varieties are all classified under the general title of thanatophidia. None of them is able to live anywhere except in ocean water. Every variety and subvariety is as poisonous as the cobra or the bushmaster of Africa. Indeed, with the exception of these two land varieties, there is no snake on land that kills so swiftly and so terribly as do the sea snakes. Owing to their fatal weapons and their ease and celerity in swimming there are practically no enemies which destroy enough of them to diminish their numbers.

Almost all the thanatophidia are beautifully colored, even more gorgeous than any of the land snakes, with the possible exception of the coral, crabs and carpet snakes. They are banded, striped, speckled and blotched with green, olive, yellow, blue and black and present a most brilliant spectacle as they are seen swimming below the surface of the transparent blue of the Indian ocean. When they are swimming at the ordinary rate of speed they seem to undulate all over. They do not wind through the water as the eel does, but their locomotion resembles that of the caterpillar except that it is far more graceful, and as they move and twist the colors play along their sides and backs as they do on the dolphin. When they dash at their prey at full speed they move like an arrow, with their heads and necks thrust straight before them if they are swimming under the surface, or, if they are darting along the top of the water, with their heads elevated just enough to clear the waves. When they are racing along thus their sole means of locomotion is their broad, paddle shaped tail, which is peculiar to all the sea snakes and forms the only striking difference between them and the ordinary land serpent.

This paddle is used like a steamer's screw and has immense power. Bent sideways it will stop the snake immediately as if the creature had anchored suddenly. When dozing or resting over reefs, which are common in the coral banks, snakes hold fast to the rocks or bottom with their broad tails and will often stay in this way for hours in calm weather.

Men may have recovered from the bites of these serpents, but there are certainly none on record. Most of their victims are Malay and other native fishermen, and shore dwellers and physicians rarely get to see them. Statistics are not kept in that part of the world, so it is impossible to ascertain how many are killed in this way each year. Travelers say that there is hardly a fishing village which has not its tale of death to tell.

Scientists once held to the opinion that the deadliness of the bite was due not to the venom, like that of the land snakes, but to some property that caused blood poison, as does the bite of many fishes which are not poisonous in themselves. But this opinion was changed after the medical men on board the British warship *Albatross* had made careful observations of a sailor who had been bitten. They proved that the snakes were directly poisonous and that they carry fangs charged with venom exactly like the cobra.

The open ocean is the home of the sea snakes. They do not even ascend the rivers. Their favorite haunts are

the arms of the sea, which separate the islands of China, India and the south Pacific seas. They don't stay near the shores, but remain at some distance from the land. They are incapable of much movement on land, and after wriggling about and biting savagely they will stay still till they die. They are found in many parts of the world—in the Indian and Pacific oceans, from Cape of Good Hope and Madagascar to the western shores of Panama and from New Zealand to Japan, in the bay of Bengal and the sea around Nicobars, Molucca, Timor and New Guinea.—New York Herald.

Grip Quickly Knocked Out.

"Some weeks ago during the severe winter weather both my wife and myself contracted severe colds which speedily developed into the worst kind of lagrippe with all its miserable symptoms," says Mr. J. S. Egleston of Maple Landing, Iowa. "Knees and joints aching, muscles sore, head stopped up, eyes and nose running, with alternate spells of chills and fever. We began using Chamberlain's Cough Remedy, aiding the same with a double dose of Chamberlain's Stomach and Liver Tablets, and by its liberal use soon completely knocked out the grip." Sold by all druggists.

He Was Absentminded.

The absentminded man is at it again. He had been reading the egg story and decided to try the trick. The first thing to do was to boil the egg. How many minutes? he asked himself, and, going to the stove with the egg in one hand and his watch in the other, he dropped the latter in the hot water. Then, placing the egg on the table, he sat down to read until the time was up. At the end of five or six minutes he was surprised to find the egg lying there before him, but, supposing that he had himself taken it from the kettle and cooled it, he proceeded to crack and peel it. The consequence may be imagined. Finally he missed his watch. The house was searched high and low, and it was not till the following morning that the cook found it in the kettle, where it had been boiling for hours.—Exchange.

Is The Moon Inhabited?

Science has proven that the moon has an atmosphere which makes life in some form possible on that satellite; but not for human beings, who have a hard enough time on this earth of ours, especially those who don't know that Electric Bitters cure headache, biliousness, malaria, chills and fever, jaundice, dyspepsia, dizziness, torpid liver, kidney complaints, general debility and female weaknesses. Unequaled as a general tonic and appetizer for weak persons and especially for the aged. It induces sound sleep. Fully guaranteed by all druggists. Price only 50c.

Fashions Caused by Deformities.

Of the close connection between fashion and deformity there are many examples. Through illness Philip the good had to have his head shaved. Shaven heads, accordingly, perforce, became fashionable at his court.

The daughters of Louis XI. hid their very large feet in long dresses; hence trailing gowns.

The wife of Philip III. set the fashion of high collars in disguising her long neck with a wimple.

Henry Plantagenet introduced boots with extravagantly curved toes to conceal a growth on one of his feet.

Louis XIV. wore a wig to cover unsightly warts on his head, while James I. adopted voluminous trunk hose, afterward fashionable, to hide hip disease.

The Original.

Foley & Co., Chicago, originated Honey and Tar as a throat and lung remedy, and on account of the great merit and popularity of Foley's Honey and Tar many imitations are offered for the genuine. These worthless imitations have similar sounding names. Beware of them. The genuine Foley's Honey and Tar is in a yellow package. Ask for it and refuse any substitute. It is the best remedy for coughs and colds. J. W. McCollum & Co.

SLEEPING CARS.

The First, Grade Ones Were Thought the Acme of Comfort.

Current advertisements describing the luxurious appointments offered the modern traveler on sea and land give point to the contrast afforded by the facilities of the middle of the last century, which were then regarded as the height to which the passengers had a right to aspire. The issue of the Pennsylvania Railroad and Mining Register of June 28, 1856, said:

"The Buffalo Car company lately shipped a lot of cars for the Illinois Central railroad which are far ahead of anything in their line yet seen in the west. One of them contained six staterooms, each room having two seats with cushioned backs, long enough for a person to lie upon. The backs of the seats are hung with hinges at the upper edge, so that they may be turned up at pleasure, thus forming two single berths, one over the other, where persons may sleep with all the comfort imaginable. In one end of the car is a small wash room, with marble washbowl, looking glass, etc. On the opposite side of the car from the staterooms is a row of seats with revolving backs, similar to barbers' chairs, so arranged that the occupant may sit straight or recline in an easy attitude at pleasure. The other five cars have each two or three similar staterooms."

The birth of the Pullman car came a little later. In the spring of 1858 George M. Pullman remodeled at Bloomington, Ill., a few of the cars of the Chicago and Alton and made them the first Pullman sleeping cars.—Railway World.

HEALTH IS YOUTH.

U'se and Sickness Bring Old Age.

Herbina, taken every morning before breakfast, will keep you in robust health; fit you to ward off disease. It cures constipation, biliousness, dyspepsia, fever, skin, liver and kidney complaints. It purifies the blood and clears the complexion. Mrs. D. W. Smith, Whitney, Texas, writes April 3, 1902: "I have used Herbina, and find it the best medicine for constipation and liver troubles. It does all you claim for it. I can highly recommend it." 50c. Sold by W. M. Johnson.

Whales.

Whales, though they are mammals, are fitted to live like fishes in water. The true whales are of two kinds of families—the sperm whale, which has teeth in the lower jaw, and the whalebone whale, which has none. Of the first-named there are two species, the cachalot and the sperm, which when full grown measures from seventy to eighty feet. The capture of this animal is attended with greater danger than that of the whalebone or Greenland whale on account of its formidable teeth.

Cured Hemorrhages of the Lungs.

"Several years since my lungs were so badly affected that I had many hemorrhages," writes A. M. Ake of Wood, Ind. "I took treatment with several physicians without any benefit. I then started to take Foley's Honey and Tar, and my lungs are now as sound as a bell. I recommend it in advanced stages of lung trouble." Foley's Honey and Tar stops the cough and heals the lungs, and prevents serious results from a cold. Refuse substitutes. J. W. McCollum & Co.

Gave Him a Start.

Holding up a pair of antique candlesticks, an auctioneer said: "Give me a start." "A dime!" came a voice from the crowd. "What!" exclaimed the horrified auctioneer. "Ah," said the bidder, "I thought that would give him a start!"

WHITE RAINBOWS.

They Are Formed by a Fine Rain and a Strong Sun.

Though rainbows are generally associated with colors, there is such a phenomenon as a white rainbow. The circumstances necessary for its formation are a fine rain and a strong sun. The phenomenon is due to the optic principle known as interference. If the drops of water be very small, the interference of the rays causes such a complete overlapping of the colors that the bow appears white.

That is to say, the various prismatic colors, instead of being thrown out separately, as in the ordinary prism, are thrown one on the top of the other, and the light is thrown by the sun, as it were, on a sheet of rain. The fine close rain produces the same effect as a woven texture. This result is still more noticeable where a fog takes the place of the rain.

The phenomenon is not often noticed, because the conditions necessary to the formation of a white rainbow are a strong light, a close rain and a sun lying near the horizon. These three conditions are not often present at the same time.—London Standard.

For State Senator.

To the Democratic Voters of Alachua County:

I have, on various occasions, been earnestly requested to enter the race for State Senator from this county, and, until now, have declined to do so, because I had no desire to oppose the Honorable H. Having served in both branches of the Legislature in the past, I feel that I am the better qualified to serve the best interests of our county at this important time.

Earnestly soliciting your support at the coming primary, I am your humble servant.
JOHN B. DELL.

In reference to my declination, which appeared in The Daily Sun of Feb. 20th, the same was made in what I conceived the interest of harmony. However, I have reconsidered same and am a candidate for the State Senate.

H. H. McCREARY.

I respectfully announce my candidacy for the Democratic nomination as Senator for Alachua county (32d district), pledging my support of all measures in the interest of the masses as against the classes; and especially do I pledge my support and influence in aid of the common schools and maintenance of the State University upon a liberal basis such as will enable parents to obtain for their children a thorough education in their own State, as well as all measures tending to promote the religious and moral welfare of the entire people. Thanking my friends for their support in the past, and soliciting the vote of all Democrats at the coming primary, I am very respectfully,
